SUMMARY

Versatile software developer with proven experience working in tech and a portfolio of hosted full-stack applications. Focused on rapid prototyping using AI accelerated workflows, and building clear, user-friendly systems that make complex information more accessible and actionable.

TECHNICAL SKILLS

- **Object-Oriented Programming:** Java, JavaScript, C#, Python
- **Web Development:** Spring Boot, Vue.js, React, Node.js, Electron
- **Database Programming:** JDBC, SQL, PostgreSQL
- **Development tools and techniques:** Agile, JUnit, Git, IntelliJ, Docker, Github Copilot, Claude Code

TECHNICAL PROJECTS

Chicago Drum Show - Music Trade Show Ticketing Application

- Designed a full-stack ticketing application that used webhooks to integrate with existing ticket sales infrastructure
- Deployed using **Google Cloud Platform** to ensure consistency with validating over **2000 tickets** on days of event
- Ensured QR codes were delivered via email to attendees, and developed camera web app for scanning and check-in
- Admin interface tracked real-time ticket scans and provided tools for resolving webhook discrepancies without down time

Hot Dog Competition - hotdogcompetition.com

- Developed a website where users can sign up, log pictures of hot dogs, and compete against each other during the summer
- Introduced the website and had **over 50 users and over 100 user posts** within one week
- Deployed on **Google Cloud Platform** using a custom **CI/CD** and container management platform

Kitchen Jam - kitchen-jam.com

- Users log their recipes, upload their own images, and generate unique insights about their cooking over time
- Active community of **30 users** - users can create a profile, add friends, and collaborate and leave comments on recipes

WORK EXPERIENCE

Drugan's Drums and Guitars | Des Plaines, IL

Ecommerce Developer

Oct '25 - Present

- Developed a suite of custom software solutions to streamline inventory management and marketing efforts.
- Built tools that reduced manual effort, improved consistency, and enabled the team to scale more with less overhead.
- Deployed business webtools using the Google Cloud Platform and created a docker-compose wrapper and UI to manage containers and streamline application CI/CD.
- Leveraged rapid prototyping with AI accelerated workflows, then worked with the team to further refine software.

Trala (iOS, Android) | Chicago, IL

Creative Content Editor

Jan '21 - Dec '24

- Created a Java application using JavaFX that automates critical video ingestion workflows
- Developed 100+ hours of video violin lessons by implementing JavaScript automation within the Adobe Suite
- Cut 40 hours from a labor intensive video translation process by implementing Python I/O scripting in content workflows
- Trained and oversaw 4 contract editors and maintained on-call hours for technical troubleshooting

EDUCATION

Tech Elevator | Remote

Full-Stack Java Web Application Bootcamp

Oct '23 - Jan '24

Full-stack Java bootcamp designing software systems and solutions with 800+ hours of education and application

DePaul University | Chicago, IL

Masters of Music

Sep '18 - Jun '20

Graduated with Distinction, GPA 3.94. Graduate research explored topics related to Jazz music and the Civil Rights Movement.

Indiana University | Bloomington, IN

Bachelors of Music

Aug '13 - May '17
